PROJECTS

StudySmarts: AI learning tool   [**Github**][**Live demo**]

Next.js │ React │ TypeScript │ Genkit │ Google Gemini │ ShadCN UI │ Tailwind CSS
- Built a web app that **generates summaries**, flashcards, and **quizzes** from user content to enhance learning.
- **Integrated Google Gemini** via Genkit for **AI-driven** content, hints, and a smart **chatbot**.
- Designed a **responsive UI** with ShadCN/Tailwind, including role-based access and PDF tools.
- Used prompt engineering to collaborate with AI, boosting development speed and creativity.
- Delivered end-to-end features, combining **clean UI/UX** with intelligent backend logic.

Layers – SaaS Landing Page   [**Github**][**Live demo**]

Next.js │ React │ TypeScript │ Tailwind CSS │ Framer Motion
- Built a fully responsive SaaS landing page optimized for accessibility and conversion.
- Designed modular, **reusable components** (Navbar, Hero, Features, Integrations, CTA) using scalable component architecture.
- Implemented smooth scrolling, sticky headers, animated gradients, and interactive cards to deliver an **engaging** user experience.
- Boosted performance with server-side rendering, image optimization, and code splitting.
- Used **Framer Motion** to add dynamic transitions and polished micro-interactions throughout the UI.
